

OUR BRANDS

global foodservice equipment

This book provides an overview of all Ali Group brands. We have dedicated one page to each company to highlight its expertise, specialization and the region in which it operates. We hope this book will be a useful tool to help our current and potential clients select the most appropriate brand for their needs.

Please do not hesitate to contact us at the address below if you require any additional copies.

A culture of excellence

With more than 60 years of manufacturing experience, Ali Group is one of the world's largest and most diversified foodservice equipment manufacturing companies. Pursuing excellence for our clients is central to every aspect of our business.

Our specialized brands and broad product portfolio benefit from Ali Group's global footprint. From Europe and the U.S. to the farthest reaches of China and Africa and some of the most remote places on earth, Ali Group is the only company that can truly operate all over the world. Our commitment to excellence never wavers.

More than 110 individual brands

Distribution in over 100 countries

14,500 employees in 29 countries

74 manufacturing plants in 17 countries

Over 40 years of manufacturing excellence and expertise

A minimum of 25 years in the market for each Ali Group brand

A passion for innovation in every foodservice sector

Innovation is pivotal to Ali Group. We focus on cutting-edge initiatives to improve processes in our factories as well as robust product development to benefit our clients. We use our heritage and vast experience in manufacturing innovative products to build for the future.

Each Ali Group brand operates independently and cultivates its own individual strengths. Having so many different, specialized brands means Ali Group has the advantage of being able to operate in almost all product categories in the kitchen.

A truly global reach

The ability to operate in remote, challenging environments

Specialist experience in each sector

A selection of strong brands that put the customer first

At Ali Group, we believe our companies need to stay close to their clients so we can understand their needs and challenges. That insight means our companies can offer a best-in-class range of products within a variety of categories, offering custom equipment for operators ranging from hotels, restaurants, schools and cafeterias to supermarkets, bakeries, patisseries and gelaterias.

Ali Group is equally experienced at providing kitchens and laundries for facilities in the oil, mining and construction industries or on military bases, often in challenging, war-torn environments.

**RECOGNIZED AS THE GLOBAL LEADER IN MEAL-DELIVERY SYSTEMS**

- ROOM SERVICE AND COOK-SERVE TRAYLINE SUPPORT SYSTEMS
- HIGH-PERFORMANCE CONVECTION/CONDUCTION RETHERMALIZATION SYSTEMS
- COMPLETE LINE OF DISHWARE, BEVERAGEWARE AND DISPOSABLES FOR TRAYTOP
- HOT AND COLD MEAL-ASSEMBLY AND TRAY DELIVERY EQUIPMENT
- DISPENSING, STORAGE AND TRANSPORTING EQUIPMENT
- STAINLESS STEEL WORK TABLES, SERVING AND UTILITY COUNTERS
- AIR-CURTAIN REFRIGERATORS

ALADDIN TEMP-RITE designs, manufactures and supplies complete meal-delivery systems, equipment and traytop products that support the healthcare foodservice industry. For nearly 50 years, its revolutionary patented products using insulation, conduction, convection and induction have led the industry to new heights of quality, safety and patient satisfaction. ALADDIN products maintain appropriate hot and cold food temperatures, so meals can be delivered at their peak of flavor and goodness, enhancing the patient experience. Our patented Heat On Demand® products keep hot food hot, and ALADDIN's Ready-Chill® cold system keeps salads, sandwiches, desserts and drinks

deliciously chilled from the kitchen to the patient bedside. Support equipment such as food counters, work tables, dispensers and air-curtain refrigerators help in assembling meals. A complete line of meal-delivery carts help serve it. For more efficient use of labor and greater latitude for meal-assembly time, ALADDIN's patented Convect-Rite III® cook-chill rethermalization system provides flexibility and simplicity of operation, while enhancing food quality, presentation and the ability to expand menu choices. ALADDIN meal-delivery systems: the right products providing solutions from the "better by degrees" people.

MGM Shanghai West Bund

Founded in 2005, this Ali Group subsidiary is the China platform to promote, sell, distribute and service a wide range of products through a locally managed partner network.

The company's headquarters are in Shanghai (Eastern China), with branch offices in Beijing (North China), Shenzhen (South China) and Chengdu (Western China). A comprehensive after-sales service network of more than 40 service points supports equipment delivery and commissioning. These Authorized Service Agents (ASA) are regularly trained and certified by our service

engineers. They exclusively stock original spare parts for the product portfolio and provide 24/7 service capability through our service hotline. ALI GROUP CHINA is a professional partner to the foodservice industry in Greater China, providing comprehensive support for design, supply, installation and servicing of innovative solutions to an array of businesses ranging from coffee shops to convenience stores, fast-food chains to hospitals, culinary schools to major hotel chains.

ACP, Inc. manufactures a full line of commercial high-speed cooking equipment carrying the AMANA, MENUMASTER, and XPRESSCHEF brands. In 1969, ACP, Inc. brought the first commercial microwave to the market under the AMANA brand. In the 1980's, ACP, Inc. introduced the first high-speed combination oven to market—the Jetwave®. Today, AMANA, MENUMASTER, and XPRESSCHEF remain the recognized leaders of commercial microwave ovens and high-speed cooking

solutions. Building upon a solid foundation of innovation, technology and state-of-the-art facilities, ACP, Inc. continues to develop new products designed to reduce cooking time, improve overall kitchen efficiency and enhance the quality and consistency of the foods prepared in our ovens. AMANA, MENUMASTER, and XPRESSCHEF products are backed by world-class 24/7/365 ComServ service and support and are fabricated and assembled in Cedar Rapids, Iowa.

AMERICAN DISH SERVICE has maintained its status as the leading manufacturer of commercial warewashing equipment for over 70 years. Since our first patented product, the Chemical Sanitizing Low-Temperature Dishwasher, ADS has risen to prominence in the field of low-energy dish machines. Current ADS designs have the highest NSF ratings for speed and reduced water consumption. Our equipment is manufactured at our 208,000 square foot facility in Edwardsville, Kansas. Every aspect of the manufacturing process – from the production of raw sheet metal to the fabrication of electrical components –

and the assembly of machines is carefully controlled to ensure the production of affordable, long-lasting machines. ADS products are marketed through a vast network of chemical distributors throughout North America. To ensure their success, we provide distributors with some of the most thorough training in the business. These hands-on, factory-based training courses are taught by knowledgeable service technicians with years of experience working with ADS equipment. No one knows dish machines better than AMERICAN DISH SERVICE.

LEADING MANUFACTURER OF CONTINUOUS-CHURNING GELATO MACHINES

- CONTINUOUS-CHURNING GELATO MACHINES

The best ice cream is just-churned fresh. Up to now, only ice cream makers have had the chance to taste freshly made ice cream. With continuous-churning gelato machines from BGI, this treat is finally available to everyone. BGI offers floor models with 1, 2, 3, 4 and 6 cylinders for additional flavors. The machines allow for very simple production of high-quality ice cream right

in front of customers. The product is as fresh as possible and customers can see the product being churned and served from the same compact machine. A new 1-cylinder countertop model has been introduced for the HORECA market. BGI's vision is a world where the tradition of Italian ice cream can be enjoyed everywhere.

BONGARD BAKERY

bongard_bakery

FRENCH BAKERY EQUIPMENT MANUFACTURER SINCE 1922

- OVEN LINE
- FERMENTATION AND CONSERVATION LINE
- DIVISION AND MOULDING LINE
- MIXING LINE

Since its founding in 1922, BONGARD has been strongly linked to bread and pastry-making history. Oscar Bongard, the company's founder, started his business by repairing and maintaining ovens damaged during World War I. An engineer by training, he soon began designing ovens. The patented CERVAP deck oven, invented in 1967, is still in production today. In the early 1980s, BONGARD expanded its range of products to include mixing, proofing and conservation equipment. In 2007, PANEOTRAD®, a unique patented process for separating and shaping pieces of dough, revolutionized the bakery industry. This innovative machine saves up to 30% of working time while minimizing flour dust and respiratory issues. Thanks to its diversification and capacity for innovation, BONGARD has become an expert in global processing equipment.

Today, BONGARD is a valued partner in the baking and pastry-making industries. The company distributes products in over 140 countries; offers installation and repair support seven days a week, 365 days a year; and provides machine training in their showroom in Holtzheim, France, or in clients' own bakeries worldwide. BONGARD'S high-performance production is complemented with innovative and energy-efficient solutions. Since January 2023, all their equipment — fitted with INTUITIV'2 and SENSITIV'2, the latest generations of electronic control panels — is progressively being connected to BONGARD CONNECT, a unique system of baking process management that allows remote control, analysis, repair and even the creation and synchronization of recipes.

ELOMA GmbH is a leading manufacturer of combi steamers, baking ovens and convection ovens for professional use. The company's "100 percent Made in Germany" philosophy guarantees the highest quality in appliances and in all processes required in today's kitchens. Since its founding in 1975, the company has continuously developed its expertise in cooking and baking and joined the Ali Group in 2007. ELOMA has a global reach of more than 65 countries. Customers range from five-star hotels and fine-dining restaurants to gas stations, trains, and care homes.

ELOMA offers a wide range of combi steamers, baking ovens and convection ovens (gas and electric) as well as a wide range of accessories such as condensation hoods, trays, grids, pans and banqueting systems. ELOMA products guarantee optimal results, high efficiency and sustainable operating costs. Customized solutions are available to meet the customer's needs.

The compact JOKER fits into any kitchen concept. It stands out for its configurable modularity, unrivaled capacity, maximum flexibility and contemporary design. The GENIUS^{MT} sets the standard for ease of use in automated cooking, baking and cleaning processes. MULTIMAX is simply uncomplicated, especially for the experienced chef looking for support in his craft. BACKMASTER is a compact unit focused on baking. It is ideal for gas stations, supermarkets and coffee shops.

ELOMA products are known for their user-friendly design and intuitive operation. This applies not only to JOKER, but also to the GENIUS^{MT} and MULTIMAX product lines. ELOMA's guiding principle is to design equipment that guarantees maximum operational efficiency. Together with engineers and craftsmen from the industry, ELOMA is constantly looking for future-proof solutions.

ESMACH, founded in the early 1970s under the name Esperia, is a company dedicated to developing and implementing sustainable solutions for bakery production.

Our core business is developing bread-making systems that ensure consistent gourmet results while also protecting the environment. ESMACH is Industry 4.0: with its spiral mixers, dividers, moulders,

conical rounders and bread groups, ESMACH is a true technological innovator in the baking industry. ESMACH is a trusted partner for bakers, offering turnkey solutions to help them work more efficiently, such as the EsmachLab system, a dynamic bakery concept that uses as little as 35 square meters to bake fresh, naturally leavened items in a matter of minutes.

FALCON has been providing the catering industry with a comprehensive range of reliable, innovative and efficient products for more than 200 years. Our customers include prisons, hospitals and care homes, universities and schools, restaurants, hotels and gastropubs, cafes and coffeeshops, and quick-service restaurants and takeaways. However, we are more than just a manufacturer and supplier of equipment. Award-winning customer service, responsive technical support, a team of highly knowledgeable sales professionals and an experienced product development chef are on hand to answer any kind of query and enable customers to

make the right choice for their business. Our laboratory and demonstration kitchen are located in our modern manufacturing facility in Central Scotland. This facility allows hands-on testing by prospective clients, and forms the heart of our product development and innovation program that has led to the design of state-of-the-art products such as the Vario-Therm bulk meal delivery system and the Connected Kitchen Monitoring Solution, as well as market-leading appliances such as our induction ranges and high-performance fryers.

Submarine Multifunction Blast Chiller - Combistation - OX Speed oven

Aroma, Pure, Gravity and Vanilla Cabinets

Since 1972, FRIULINOX have created blast chilling and freezing solutions, storage and refrigeration systems at the peak of performance, quality and style: from design to construction, as part of an industrial process that combines Italian excellence, international standards and environmental sustainability.

Managing time and transformation processes to improve the quality of products, work and life is our mission. From a small artisan workshop to the kitchen of a large restaurant, in the simplest of preparations as in the most complex ones, time management is the secret of success. FRIULINOX technology stops, slows down and accelerates time with extraordinary versatility and precision, breaking down the limits of the seasons and the transformation of ingredients.

But it does even more, anticipating the demands of professionals and exploiting new digital technologies to manage the entire workflow, even remotely, 24 hours a day.

FRIULINOX systems are distributed in more than 90 countries, in all catering and food sectors. Restaurants and pizzerias of all sizes, pastry shops and bakeries, gastronomy departments in large-scale retail, self service, cooking centres, kitchens in hospitals and nursing homes, canteens in work environments and collective spaces are just some of the areas in which FRIULINOX solutions are used. They ensure the highest levels of versatility, reliability, service, optimization of food products and reduction of energy consumption.

FRYMASTER®, a Welbilt® brand, is one of the world's leading manufacturers of commercial fryers for the foodservice industry and has spent nearly a century creating products that are efficient, cost-effective, and long-lasting. FRYMASTER continually raises equipment performance levels so operators can achieve operating efficiencies, produce high-quality, great-tasting foods, and realize outstanding value in their foodservice operations. Offering fryers and hot holding equipment that preserve optimal food quality, FRYMASTER equipment designs are intuitively

engineered to maximize both flavor and profits. Advanced features such as built-in oil quality sensors, automatic filtration, and real-time alerts, meet today's demands for healthier food choices, great-tasting foods, as well as lower oil usage costs. Fryers connected to the Internet provide visibility of fryer activity, enabling operators to keep a finger on the pulse of day-to-day operations. With FRYMASTER'S state-of-the-art technology that monitors and conserves resources, operations will run lean and smooth, saving both time and money.

Tumble dryer GD275-600
Available with three heating options: electric, gas and steam. Electric version standard in double-stage power while gas heated with linear modulation.

Tumble dryer GD450 and washing machine GWH180 on a base for a perfect match. Up to 140kg per day of laundry washed and dried.

GWH350-450-600 washing machine range matching the new GD800 and GD1000 range of tumble dryers.

The new space-saving and fully automatic GI1218 and GI1418 roller ironers. Temperature, roller speed and basin thrust are always under control and manageable.

THE MANUFACTURER OF A COMPLETE RANGE OF HIGH-QUALITY PROFESSIONAL LAUNDRY EQUIPMENT

- WASHING MACHINES
- TUMBLE DRYERS
- ROLLER IRONERS

Since 1972, GRANDIMPIANTI I.L.E. has been offering a wide range of high-quality laundry equipment for the professional care of textiles: washing machines, dryers and roller ironers. The company produces a wide range of innovative, smart, user-friendly and interactive equipment. Washing machines and tumble dryers are equipped with the Wavy electronic control. Since the beginning of 2023, the range has broadened with two new capacities: 40kg and 50kg large-size tumble dryers with the same smart technology. The vertical LCD touchscreen display and shiny fronts are inspired by the high-tech field and provide an additional level of quality to the equipment.

The innovative Wavy electronic control is interactive, multi-level and always up-to-date, thanks to the new cloud service called TheMind. This cloud is a network of information, diagrams and processes that are constantly available. Monitoring, analysing and managing the activity of one or more pieces of equipment or structures is finally just a click away, thanks to the TheMind.

In 2023 a complete new range of roller ironers arrives on the market: different roller diameters and lengths are now offered to satisfy every kind of textile ironing, together with two types of electronic controls: the basic FOX and the touchscreen equipped WISE.

- SPRAY ICE MAKERS
- MODULAR ICE MAKERS
- FLAKE ICE MAKERS
- INSULATED ICE STORAGE BINS

K25: Self-contained paddle ice maker

C54: Self-contained spray ice maker

M305 + MG305: Modular ice maker over
insulated storage bin

B200C: Self-contained flake ice maker

ICEMATIC is synonymous with ice makers. Since Castel MAC was founded in 1963, the ICEMATIC division has grown to be a European leader in the sector. The company now exports to more than 70 countries and maintains a leading position in Italy, where it is based. ICEMATIC ice makers are known for their performance, reliability and ease of installation. The main product line is the K series paddle system machine for hollow cube production, which can work with highly scaled water. The new line of ice machines is the C series, which introduces the spray system to

the ICEMATIC range of products. The C line allows ICEMATIC to offer a complementary solution to hollow cubes in those markets where the full compact ice cube is preferred. Both lines have been developed for optimal performance, environmental sustainability, easy cleaning and installation. The entire range of products, from modular cubers to flake ice makers, offers a wide spectrum of solutions for ice storage and transportation. ICEMATIC received its ISO 9001 in 1995, a testimony to its commitment to quality.

- ULTIMATE TECHNOLOGY PASTEURIZERS

In 1927, when Otello Cattabriga was hard at work on the world's first automatic gelato machine, he never imagined that his name would be a point of reference in the industry today. Ninety years later, CATTABRIGA is still the leading supplier of high-quality gelato manufacturing equipment. CATTABRIGA electronic pasteurizers are unequaled in today's market, and

the same can be said for EFFE vertical gelato makers. With the increased interest in artisanal food products, the EFFE machine has become extremely popular, especially in gelaterias where the gelato-making is visible. These iconic machines are an updated version of the very first automatic gelato maker developed by Otello Cattabriga.

Established in the United States in 1964, COLDELITE distinguished itself as a soft-serve ice cream leader. In the late 1970s, building on the strength of its successes in America, COLDELITE tackled the European market. In Europe, the product line broadened to include Compacta, a high-quality, traditional gelato machine featuring a

simple and quick production system. The COLDELITE commitment to quality, combined with the outstanding performance of the Compacta line, has contributed to the company's continued success. Within ICETEAM1927, COLDELITE stands for quality and innovation.

Makes 1 1/4" x 1 1/4" x 1 1/4" Big cubes

KD-110 Undercounter Ice Machine
Makes 1" x 1" x 1 1/4" Cocktail cubes

Ice is the starting point of any beverage. In 1955, KOLD-DRAFT began producing automatic ice machines. Using a unique evaporator and water plate system, KOLD-DRAFT's design produced perfect, pure, clean, hard ice cubes – every time. The "upside down" horizontal evaporator was the key. Water is shot up into the evaporator cells at an incredibly high rate of speed and freezes from the outside in. This system washes out minerals and foreign substances before the water freezes, producing pure

cubes that melt slower. Slower-melting ice brings drinks closer to the temperature of the ice without diluting them, keeps food colder longer, and lasts longer in coolers. The finest restaurants, hotel chains, mixologists, bartenders and cocktail enthusiasts worldwide call for beautifully crafted ice as the starting point for their food and beverages. With KOLD-DRAFT ice as the foundation, any recipe can be fabulous. Kold-Draft machines are engineered to give you 99.9% pure ice.

STATE-OF-THE-ART OVENS FOR PROFESSIONAL KITCHENS

- COMBI OVENS
- CONVECTION OVENS
- PASTRY/BAKERY OVENS
- BLAST CHILLERS AND SHOCK FREEZERS FOR PROFESSIONAL CATERING, CONFECTIONERY/BAKERY
- REGENERATION AND HOLDING CABINETS

In 1981 the LAINOX company was founded in Vittorio Veneto, Treviso, Italy, specializing in designing and creating equipment, especially multi-use ovens, for professional restaurateurs.

The company's strong entrepreneurial spirit and the quality of its innovations quickly propelled it to being a market leader in Italy and beyond. LAINOX products and services are admired by chefs worldwide and, with a complete range of cooking equipment on five continents, it is considered a global leader. Always at the forefront of innovation, and sensitive to its customers' needs, LAINOX developed Naboo, the first smart cooking device; it is not just a combi steamer, but a real kitchen helper that combines

optimal performance with an almost endless supply of information, updates and know-how. Now LAINOX has developed Naboo Boosted, the best combi oven ever. Research, innovation and training are the three main ingredients in the LAINOX recipe for success. Oracle, Lainox's new oven, was created from LAINOX experience in designing innovative systems for cooking food. Oracle is an accelerated cooking oven which can be transformed into a Combi Wave, if necessary, so it can adapt every kind of need. The corporate mission, "Excellence in the kitchen," embodies the company's drive for improvement, and its fearlessness in taking on the most difficult challenges in the market.

Our newest 2424 Aperia impinger oven is Lincoln's fastest oven, reducing cook times by up to 20% vs. our Fast Bake ovens and traditional competitive impingement ovens

A LEADING PRODUCER OF HIGH-PERFORMANCE CONVEYOR OVENS

- COUNTERTOP AND VENTLESS
- FREE-STANDING CONVEYOR OVENS UP TO 32" BELT WIDTH

1100 Series impinger ovens with easyTouch controls

Dual-voltage DCTI digital countertop impinger converts to 208 or 240 voltage based on your needs

LINCOLN®, a Welbilt® brand, pioneered impingement cooking technology in conveyor ovens in 1982. Lincoln has been voted by the foodservice and hospitality industry as the best conveyor oven manufacturer for a record 17 consecutive years. LINCOLN impinger ovens allow for rapid heating, cooking, baking, and crisping, enabling even high-volume operations to fill customer orders rapidly. This technology enables high-quality foods to be cooked perfectly with a minimal cook time.

The launch of the Aperia high-performance oven platform advances LINCOLN's leading technology with independent top and bottom variable-speed airflow technology, which reduces cook time and eliminates the need for different finger configurations. LINCOLN is proud to offer this new high-speed conveyor oven in three different belt widths and in electric, electric ventless and an industry-first gas model.

In 1857, Wilfred Weed Montague started a humble business, peddling pots, pans, and general hardware items in San Francisco. Known for his reputation for uncompromising quality, W.W. eventually began manufacturing "French" ranges. A combination of brick and steel ovens and tops, these original ranges built the foundation of Montague.

In 1902, the original Locke and Montague company was purchased and incorporated in 1910 as W.W. Montague Company, Inc. By that time, Montague had become widely recognized as "The Leading Stovehouse on the Pacific Coast," according to Hammond's Handy Atlas of the World. In 1918, W.W. Montague Company became Montague Range and Furnace Company, Ltd.

In 1932, during the depths of the Great Depression, the firm encountered financial difficulties. The company was acquired by

Joseph M. Whalen, a Montague employee who had worked his way up to foreman after starting as a sheet metal mechanic in the early 1920s. In 1936, the company operations were divided, with partner Roy Shae taking on the furnace side of the business. Joseph Whalen retained the range business and moved to Mission Street in San Francisco, where he began operating under the current name of The Montague Company.

In 2022, Montague became part of the Ali Group and today offers powerful, high-volume, heavy-duty cooking and refrigeration equipment for any foodservice kitchen, proudly manufactured in the U.S. by skilled craftsmen. From custom island suites to ranges, ovens, broilers, fryers, refrigerated bases and much more, Montague has been dedicated to bringing professional chefs of the world premium-quality equipment since 1857.

Rotary-Type Glasswasher

Door-Type Dishmachine

For over 70 years the name MOYER DIEBEL has been synonymous with the very best in glasswashing and warewashing systems for high-volume applications in the biggest hotels, casinos, fast-food chains, bars and pubs.

With its solid construction and unique design, the MOYER DIEBEL system eliminates much of the manual handling associated with warewashing processes, producing sparkling clean glassware that

is completely sanitized, cooled and ready for immediate use right out of the machine. This enables customers to save on labor costs, reduces breakage and increases overall efficiency.

The company's modern plant, on the shores of Lake Ontario in Canada, designs, produces and supplies services for machinery employing both traditional hot water washing systems and chemical sanitization systems.

Multiplex Fresh Blends integrated beverage system

A WORLD-LEADING MANUFACTURER OF HIGH-CAPACITY BEVERAGE DISPENSING SYSTEMS FOR THE FOODSERVICE INDUSTRY

- REFRIGERATION
- BACKROOM AND BEVERAGE SYSTEMS
- DISPENSERS
- BLENDED AND INFUSED

MULTIPLEX®, a Welbilt® brand, is a industry-leading manufacturer of high-capacity beverage dispensing systems for the foodservice industry. Serving on-trend and refreshing drinking experiences to customers, MULTIPLEX beverage systems simplify the dispensing of soda, beer and blended beverages.

MULTIPLEX solutions are found in the world's leading quick-serve restaurants, theaters, convenience stores, casual dining restaurants, bars and other venues. From quick, reliable, and economical serving solutions for busy bars to innovative made-to-order cold beverage dispensing units, the brand's portfolio is high-performing, energy-efficient and ready to serve tomorrow's tastes and flavors.

Our ICECORE remote cooling systems have been designed to improve reliability and lower service cost by using energy-efficient natural refrigerants. This enables better performance

from smaller compressors.

MCCANN'S™ has been pioneering the design and manufacture of carbonated beverage systems. Our carbonators deliver the perfect soda experience by adding that refreshing "fizz" your customers love in a beverage.

SERVEND®, our line of self-serve beverage dispensers, provides customers with millions of combinations to customize their drink to their individual taste — carbonated or non-carbonated, multiple flavor options, cube or crushed ice.

The MULTIPLEX Fresh Blender is a compact integrated beverage system which offers a wide range of ice-cold drinks from smoothies to cold brew and lemonades in approximately 90 seconds. It's the only automated blend-in-cup system that eliminates waste and delivers a flawless experience with every drink order.

Diamante. Making space for efficiency

Flexible choice for unlimited personalisation

OLIS has been a well-known name in the catering industry since 1972, thanks to its top-quality production of machinery, appliances and components, and for being a partner of the Ali Group since 2004. The brand stands out for its traditional craftsmanship, most notably with stainless steel. Over the years, it has developed

products with an innovative approach that focuses on technology and design. OLIS has developed a new concept of space, function, attention to detail and materials, all of which is well expressed in the new Diamante Line. Just as the best recipes can be invented anew, we aim to continue satisfying and surprising you.

FITKITCHEN. FOOD-INSPIRING TECHNOLOGY

- COMPLETE TURNKEY PROJECTS
- QUICK-SERVE RESTAURANT KITCHEN EQUIPMENT SUPPLIER
- HOT AND COLD HOLDING EQUIPMENT
- PROFESSIONAL AFTER-SALES SERVICE

The FITKITCHEN® team includes a wealth of resources for customers with experts from engineering, culinary, industrial design, and restaurant operations with access to cutting-edge equipment innovations and emerging technologies.

Understanding the interaction of food, beverage, people and equipment means producing kitchens that answer questions about how to reduce labor, do more with less, increase sales and revenue and keep menus fresh, all with a focus on the individual operation. At FITKITCHEN, we are dedicated to transforming your establishment.

The goal of FITKITCHEN is to provide customized solutions that:

- Reduce footprints and right-size equipment to reduce capital and labor costs.
- Improve speed of service and quality of food to increase customer experience and retention.
- Introduce new technology and products that deliver smart and lean kitchens.

Contact us through your WELBILT® representative for a consultation and discussion on your unique challenges.
